## Why can't I withdraw my ASK in pending?

Permission Support - 2024-10-18 - Withdrawal

Here are the three main reasons why the 'Withdraw' button is not yet enabled:

1. You haven't successfully completed your ID verification.
2. You haven't earned enough ASK, and your pending ASK is below the required threshold.
3. Your pending ASK is not yet available for withdrawal—it may take a few days for it to become available.
